

CIL WORKSHOP

The **Central instrumentation laboratories (CIL)** was established at Panjab university, Chandigarh in 1984 with the purpose of assisting in procurement of various equipments and framing specifications of equipments for medical education, scientific research, Engineering education & etc. The staff of CIL can provide full assistance to all university departments for procuring / framing specifications and for repair and maintenance of equipments. This department not only is engaged in the **repair and the maintenance** of various equipments used for medical education, Engineering education, scientific research and services but also helps in the research activities by **modifying the instruments** according to the needs.

The staff at CIL is highly trained in different **discipline** such as: -

1. Electronics
2. Electrical
3. Mechanical (Fitter, Turner & Tool Maker)
4. Glass Blowing
5. Refrigeration
6. Painting, Carpentry & Joiner

CIL also undertakes fabrication and design work of useful gadgets as per the specifications provided by the departments.

In addition, our staff is capable of developing instruments based upon requirement of the users. The service charges are nominal and are based on the nature of work, type of instrument and time spent on a particular sophisticated instrument. Please note that a '**service manual**' is essential for a typical instrument required for servicing.

For further assistance, contact **Director CIL, Panjab University, Chandigarh.**
